

## Course Description

### PER-353 Active Shooter Incident Management with Complex Incidents

#### Description:

This course provides a model framework to improve incident management and the integration of law enforcement, fire, and EMS responders during active shooter event response, improving time to threat neutralization, medical intervention, and survivability of victims. This is an integrated response course for a cross-discipline audience of 30 law enforcement, 20 fire/EMS, and 5 telecommunicator (dispatcher), 2 public information officers, 2 emergency managers, and one law enforcement helicopter pilot of mixed rank (i.e., line through supervisors and leadership). The framework utilizes the Active Shooter Incident Management Checklist, a validated active shooter event response checklist, integrating best practices guided by principles of the National Incident Management System (NIMS), Tactical Emergency Casualty Care (TECC), and Advanced Law Enforcement Rapid Response Training (ALERTT). Participants will learn organizational building blocks for an integrated response including Contact Team, Rescue Task Force, Tactical, Perimeter, Triage, Transport, Intelligence, and Reunification through progressively challenging full-length Active Shooter Event functional exercise scenarios and hands-on experience in multiple response roles. The course also introduces participants to Complex Coordinated Attacks (CCA), including the added complexities of Improvised explosive devices, an attacker who becomes static, barricades or takes hostages, and a multi-modal CCA.

#### Course Objectives:

- Describe the profile of a typical Active Shooter Event and practice the model response process using the Active Shooter Incident Management Checklist.
- Apply key leadership roles and functions within an Active Shooter Event (ASE) response.
- Demonstrate response and management of Basic Complexity and Moderate Complexity Active Shooter Events in simulation-based practical exercises.
- Demonstrate response and management of Complex Coordinated Attacks (CCA) in simulation-based practical exercises.
- Demonstrate response and management of Moderate Complexity ASE that includes IED and/or an Attacker who becomes static, barricades, or takes hostages in simulation-based practical exercises.
- Discuss case studies of multi-modal CCA.

#### Prerequisites:

**You must be a US Citizen to take this course. If you are not please let us know by email for further instruction at [OEM.TRAINING@DHSES.NY.GOV](mailto:OEM.TRAINING@DHSES.NY.GOV)**

All participants must have a FEMA Student Identification (FEMA SID) number. Students can search for their existing/create a new FEMA SID at: <https://cdp.dhs.gov/femasid/>.

#### Length: 24 Hours

#### Target Audience:

- Emergency Management
- Emergency Medical Services
- Fire Service
- Law Enforcement
- Public Safety Communications
- Search & Rescue

#### Cost:

There is no fee for the course. Other cost considerations are detailed in each LMS course offering.

#### Signup Details:

Register through the New York State DHSES Learning Management System. Access the LMS through the link on the calendar webpage.
